

The Terra Nine Experience

Terra Nine is the electronic brainchild of Michael Westcot - Hardly your typical digital artist. A classically trained violinist, he produces a truly unique synergy of lush organic strings, mind bending psychedelic sounds and a fat bottom end full of twisted beats and dubbed out bass lines... Running the gamut of trance, dub and psychedelic breaks... To experience is to understand... Terra Nine moves the heart and soul as well as the feet.

Terra Nine Discography

Over ten years, Terra Nine has released 5 albums and an EP through Tempest Recordings (CUT Group) as well as appearing on myriad compilations. His 2007 release ~ Strange Craft ~ was a masterful mix of ambient electronica that met with critical acclaim worldwide. The 2009 album release ~ Stream of Consciousness ~ featured a unique mix of psychedelic dub, trance and breaks fused with vocals and lyrics from NZ songwriter: Aviatrix, as well as international guests: dub maestro OTT remixing the track No Return and Pete Ardron from Orchid Star, with a magical remix of Whisper.
